SUMMARY

Full-Stack Software Engineer with 4+ years building, deploying, and scaling production web applications. Strong in React/Next.js, Node.js/TypeScript, distributed REST API design, and AWS cloud architecture. Owns systems end-to-end, from design through production rollout, monitoring, and long-term maintenance. Uses AI coding agents (Claude Code, custom agents, MCP integrations) daily to accelerate delivery.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Python

Frontend: React, Next.js, Vue, Angular, Tailwind

Backend & Data: Node.js, REST APIs, PostgreSQL, MySQL, MongoDB, DynamoDB

Cloud & DevOps: AWS (Lambda, EC2, S3, CloudFormation, CodeBuild, CodePipeline, Amplify), Docker, CI/CD, GitHub Actions, monitoring (CloudWatch, OpenSearch)

Testing: Jest, Cypress, Playwright, Mocha

AI Development: Claude Code, custom agents and skills, MCP (Model Context Protocol), AI-assisted development

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer, Sekady Capital

12/2021 – 05/2026

Fruitland, Idaho

- Owned major product areas end-to-end across the full stack, including the fund control dashboard and inspection wizard, from design through production rollout, instrumentation, and long-term maintenance.
- Engineered RESTful API integrations across distributed services using Node.js/TypeScript, reducing integration failures and improving cross-service data consistency under load.
- Designed and maintained AWS infrastructure (CloudFormation, CodeBuild, CodePipeline) supporting distributed workloads, background processing, and scalable API services for 15,000 active users.
- Built data aggregations and optimized data inflow in Vue/Next.js, cutting page load times by 80%.
- Set up integrated testing and automated test runners, cutting code review and deployment time by ~30% while reducing production incidents.
- Reduced third-party geolocation and map-rendering costs by ~\$2,000/year with no loss of functionality.

Behavioral Support Specialist, Developmental Concepts / CDAN Idaho

10/2014 – 08/2021

Boise, Idaho

- Logged and analyzed daily behavioral data to develop data-driven support plans for clients.
- Resolved high-pressure situations using structured crisis-management techniques.
- Worked independently and autonomously with clients across a varied caseload.

IT Support Technician, Galexis Technology

03/2013 – 09/2014

Pullman, Washington

- Installed and configured relay antennas to deliver rural internet service across the Palouse region.
- Provided customer support on basic to complex computer and network issues.
- Advised small businesses and individuals on network solutions, security concerns, and technology setup.

EDUCATION & CERTIFICATIONS

B.S., Virtual Technology & Design, University of Idaho

Full-Stack Development Certificate, CodeWorks

Human-Centered Design Certificate, Interaction Design Foundation
